```
1 package hcff;
 2 //importing scanner to collect input
 3 import java.util.Scanner;
 4 public class Hcff {
       public static void main(String[] args) {
           Scanner input = new Scanner(System.in);
 6
 7
           System.out.print(" enter first number : ");
 8
          int first= input.nextInt();
 9
          System.out.print(" enter second number : ");
10
          int second = input.nextInt();
11
          int h c f =gcd(first, second);
12
           System.out.print("The HCF of of the input numbers is : "+h c f);
13
       }
14
      //a fuction to calculate greatest common divisor
15
      private static int gcd (int a, int b) {
16
        if (b==0)
17
             return a;
18
        return gcd(b,a%b);
19
      }
20
21 }
```
